The QUT Health Clinics aim to provide quality clinical education to the next generation of healthcare professionals and quality patient care to the community. The clinics deliver low-cost healthcare services across Eating Disorders, Exercise Physiology, Family Mediation, Nutrition and Dietetics, Optometry, Podiatry and Psychology and Counselling.

Services are provided by students under the supervision of accredited clinicians and provide valuable clinical placements and ‘real world’ experience for our students.

Eating Disorders
The Eating Disorders Clinic offers an interdisciplinary approach for individualised treatments for adolescents and adults with eating disorders other than Anorexia Nervosa.

Exercise Physiology
The Exercise Physiology Clinic provides specialised clinical exercise interventions for persons at risk of developing, or with existing chronic and complex medical conditions and injuries.

Family Mediation
The Family Mediation Service provides highly skilled mediation at a low cost for parents who have separated and need to make arrangements regarding the care of their children.

Nutrition and Dietetics
The Nutrition and Dietetics Clinic provides comprehensive nutrition assessments and individualised dietary advice for the management of health concerns and sports performance.

Optometry
The Optometry Clinic provides eye examinations, lens prescriptions and eye wear, as well as specialist services including contact lenses, children’s vision, myopia clinic and low vision clinic.

Podiatry
The Podiatry Clinic provides high-quality podiatric patient care to the community. The clinic has a dedicated sports clinic, paediatric facilities, surgery services and a high risk foot clinic.

Psychology and Counselling
The Psychology and Counselling Clinic provides affordable, professional psychological assessments, individual therapy, family therapy and counselling services for the general public.

Social Work services
Psychosocial support services are provided to patients of the clinics by Social Work students, who also support the clinics’ community outreach work and are supervised by a qualified social worker.

CLINICAL PLACEMENT AND FACILITIES

CLINICAL PLACEMENT
Just under 600 QUT Health students undertook more than 100,000 clinical placement hours at the QUT Health Clinics in 2015. Over 34,000 occasions of service were conducted by QUT Health students and staff in 2015. This ‘real world’ training in a professional health environment is fundamental to the QUT Health Clinics.

FACILITIES
The QUT Health Clinics is a three level facility holding 120 rooms across the clinics. The clinics have specifically designed suites to cater to the clinical requirements and patient needs. Clinics have state-of-the-art equipment in order to maximise learning outcomes for students.

FOR HEALTH PROFESSIONALS
Referrals to the QUT Health Clinics are welcome. A referral form is available on our website at www.healthclinics.qut.edu.au, and we accept General Practitioner Management Plans and Team Care Arrangements.

COMMUNITY OUTREACH
The QUT Health Clinics provide a wide range of unique health initiatives and community events throughout the year. Many of our events are delivered annually and aim to deliver quality patient care to the community, as well as providing an enriching learning experience to our students undertaking clinical placement.

The clinics deliver on-campus and in-school health based activities to students from low socioeconomic, regional and Indigenous communities. These activities and events strive to build both aspiration and motivation for tertiary study to those who have not traditionally considered university study. In 2015 more than 3500 school students participated in the Health Widening Participation program.
