Interdisciplinary Primary Healthcare Workshop:

the journey through the system from the patient’s perspective

- **Where:** QUT Gardens Point Theatre (Gardens Point Campus)
- **When:** Wednesday 9 April 2014 9am–5pm
- **Cost:** $385 (includes course notes, materials and morning tea, lunch and afternoon tea)

Follow a patient with type 2 diabetes on their journey from their GP through the network of a multidisciplinary team, all working together to enhance the outcome for the patient.

Guest presenters include a vascular surgeon, general practitioner, dietitian, nurse practitioners and podiatrists:

**Michelle Gibb**
Michelle is a Nurse Practitioner in Wound Management and leads the Wound Healing Community Outreach Service at Queensland University of Technology. Michelle has more than ten years experience in wound management and has worked in the general practice, acute, community and aged-care residential environments.

**Dr John Bingley**
John was born, raised and educated in Queensland, and with the exception of two years of vascular surgical training in Melbourne, he has practiced medicine in Queensland since 1988. He has a broad experience in clinical medicine, basic scientific research and medical administration.

**Kerry Porter**
Kerry has over 18 years experience working in diabetes. She is an endorsed Nurse Practitioner and a credentialled diabetes educator who has completed her Master in Nursing (Nurse Practitioner). She has vast experience in both the public and private sector working with children and adults with type 1, type 2, insulin pump therapy and diabetes in pregnancy.

**Pete Lazzarini**
Pete is a Queensland Health and QUT Research Fellow (Podiatry) and serves on many national diabetes and podiatry advisory committees. His research interests are in foot ulcer and diabetic foot disease and he is particularly motivated by research that reduces foot-related hospitalisation and amputation. After leading a number of Queensland diabetic foot research projects Pete has recently established a foot disease research program at QUT.

**Lloyd Reed**
Associate Professor Lloyd Reed is the Head of the Podiatry Discipline at QUT. He has particular teaching and research expertise in the areas of musculoskeletal foot problems, clinical biomechanics and gait analysis. He is involved in numerous research projects investigating the prevalence, prevention and management of foot complications in diabetes.

**Dr Gary Deed**
Dr Deed is a general practitioner who has specialised in the field of diabetes for many years. He is currently the National Chair for the Diabetes Specific Interest Group and has previously worked as the Director at Diabetes QLD. He is also a columnist for Diabetic Living and is the past president of Diabetes Australia.
